

Sai Pavan Vallabhareddy

Full Stack Developer

✉ saipavan2024@gmail.com ☎ 8374672844 📍 Kothapeta, India

PROFILE

Full Stack Developer with experience building scalable web applications using React, Node.js, Express, and MySQL. Strong in REST API development, cloud-integrated applications, and end-to-end feature delivery from database design to responsive UI. Experienced with AWS serverless services and performance optimization in production environments.

PROFESSIONAL EXPERIENCE

Full Stack Developer (Cloud & Web) 2SSquare Solutions May 2024 – Present

- Engineered analytics dashboards and reusable React.js components, improving UI responsiveness and reducing page load time by ~25%.
- Designed and delivered RESTful APIs using Node.js and Express.js, supporting multiple data-driven modules including leaderboard and analytics systems.
- Integrated AWS Amplify, Cognito, and Amazon S3, enabling secure authentication and scalable file storage for production environments.
- Orchestrated event-driven leaderboard workflows using AWS Lambda and DynamoDB Streams, handling real-time updates efficiently.
- Established push notification pipelines using Firebase and AWS AppSync, improving user engagement and real-time communication.
- Contributed to AI-powered notification workflows using AWS Bedrock, enabling automated and personalized messaging.

PROJECTS

Dashpod – Sports & Fitness Analytics Platform May 2024 – Present

Tech Stack: React.js, Node.js, Express.js, AWS (Lambda, AppSync, DynamoDB, Amplify), MySQL

- Crafted responsive dashboards using React.js, enabling performance tracking across multiple players and categories.
- Leveraged AWS services for authentication, storage, and real-time synchronization of analytics data.
- Delivered ranking and performance visualization modules, improving data visibility and decision-making for users.

EmbeHome – Inventory & Storage System

Tech Stack: React.js, Node.js, Express.js, MySQL

- Architected a full-stack inventory management system, reducing manual tracking effort and improving operational efficiency.
- Enabled stock tracking, product lifecycle management, and reporting workflows for business operations.
- Structured backend services with REST APIs, validation layers, and modular routing for maintainability.
- Optimized MySQL schema design, improving query performance and data retrieval efficiency.

ACHIEVEMENTS

- Completed a 200-day full-stack development challenge, building and deploying 40+ projects including REST APIs, dashboards, and CRUD applications using React, Node.js, SQL, JavaScript, and AWS, strengthening expertise in data structures, algorithms, and backend architecture
- Maintained a 200+ day continuous development streak, solving structured problems and implementing real-world features to improve problem-solving and system design skills
- Designed and deployed a project showcase platform to present build outputs, technical implementations, and development progress in a structured and accessible format
- Project Portfolio
- 200 Days Build Journey Platform: <https://build200.lovable.app> 

SKILLS

Frontend Technologies — React.js, JavaScript, HTML5, CSS3, Responsive Web Design, Flexbox

Backend Technologies — Node.js, Express.js, REST APIs, Authentication, API Integration

Databases — MySQL, SQLite, Amazon DynamoDB

Cloud & AWS Services — AWS Amplify, EC2, Lambda, S3, Cognito, IAM, DynamoDB Streams, AppSync, EventBridge, CloudWatch, AWS Bedrock

Developer Tools — Git, GitHub, Visual Studio Code, Thunder Client, Firebase, GraphQL

EDUCATION

BVC Engineering College, 2020 – 2024 | Odalarevu, India
B.Tech in Computer Science Engineering (AI & DS)
CGPA - 7.98

CERTIFICATES

- | | |
|---|---|
| • Build Your Own Responsive Website  | • JavaScript Essentials  |
| • Programming Foundations with Python  | • Introduction to Databases  |
| • Node.js  | • Generative AI  |
